Client communications

EDUCATION

BACHELOR OF SCIENCE - PSYCHOLOGY
University of Washington, Seattle

MINOR - LAW, SOCIETY AND JUSTICE
University of Washington, Seattle

EMPLOYMENT HISTORY

Foundry Interactive – Front End Developer

Seattle, WA / Sept 2017 – Present

- Primary developer on a large React project that acts as the front-end UI for a healthcare API. Displays queries for insurance companies with edit/delete functionality. Based on CRA-rewired, utilizing Redux and Redux-forms with a client component library.
- Completed a website redesign for a large-scale merger in the healthcare industry. Took on team lead responsibilities across 7 different web applications used by millions of people.
- Created and optimized team Git flow process between 4 repos across 2 forks while meeting client requirements to integrate with their project management software.
- Conducted daily, rigorous code reviews of peer work and maintained documentation of team-wide code standards.
- Created reusable front-end infrastructure to be used between projects including a task runner (Grunt) and CSS preprocessors (LESS/SASS).

posed2, Inc. – Data Analysis Intern

Seattle, WA / August 2017 – Sept 2017

- Analyzed data from thousands of users to search for trends in personality and extrapolate career and education suggestions.
- Used Python 3.6 with numpy to write functions that generated client-facing visualizations of user data.
- Worked with team to research and select a best-fit cloud computing platform for the company.

3MD Inc. – Mobile Asset Technician

Redmond, WA / June 2016 – March 2017

- Responsible for maintaining and tracking over 300 phones, tablets and other mobile devices for the Microsoft Office development team.
- Led daily client communication with Microsoft managers and employees to track ~60 missing devices and facilitate their return.
- Assisted with editing of Powershell scripts that automated the device checkout process.
